His own wave theory of the aeer stems directly from Sir Isaac ewton, who believed gravitation o be a wave phenomenon but could not prove it satisfactorily. "Both are wave phenomena due to waves in the ether, and their processes can low be adequately explained. Tularemia was first reported in 1911 in ground squirrels in Calithough no human cases have been reported from that State xcept in laboratory infections. I was recognized in Japan in 1925 bout the same time that it began to be known in the United tates. Cases in 19 States have een reported in the past two ears. It is an infectious disease aused by bacterium tularedse, pri-narily in nature as a fatal baceremia of wild rodents, especially abbits and wild hares. Secondarily it is a disease of man trans-mitted from rodents to man by the ite of an infected blood-sucking fly or tick, or by contamination of with portions of the internal nfected rodents, flies or ticks. The sease is so named on account of he presence in the blood of the ausative micro-organism.

A case is reported from Montana rom the bite of a coyote and one the same State by a ground quirrel, one in Iowa from the bite a hog, though reports show that e most common form of infection from contamination or self-inoc lation. The oldest person report. ed with the disease was 73, the coungest 2 years old. Of 220 cases, aly eight were Negroes

The same day as the Lovelace ases were reported a woman about 50 years old living at Lowell, 10 miles distant, was stricken and is in a critical condition. One at Fayetteville, 23 miles away, is recovering. Death is said to be rare but recovery is slow, usually month before the patient can leave his hed and twice that long before he is fully recovered. The Love lace cases are the second reported Little Rock having been infected about three months ago, and both recovering.

Only Four Cases Reported in Illinois in Recent Years.

SPRINGFIELD, Ill., March 18.-Tularemia, the so-called "rabbi disease," is a "new" disease, although it has existed unrecognized for a number of years adn was not worked out in its entirety until 1921, according to Thomas G. Hull. chief bacteriologist of the Illinois Department of Public Health.

The casuative agent of tular-emie was isolated in 1912 by Dr. McCoy of the United States Public Health Service, who, a year prerious, had discovered a like disease of rodents" in Califor-

nia ground squirrels. Only four cases of the disease nave been reported in human beings in this State in recent years, according to officials of the State Department of Public Health, Last year, two such cases were reported to the department, one from Lawenceville, where a hunter had con tracted the disease when the blood of a rabbit diseased with tularemia had entered an abrasion on his hand, and caused an ulcer. The second case came from Noble, Ill. where a case was contracted by man who, after handling rabbits and shaved and cut himself, the disease being contracted through

the cut on his face. Symptoms of Disease.
Symptoms of the disease are given in a paper prepared on the disease by Hull. "The incubation period," he says, "is about two to five days. The onset is sudden. manifested by headache, chills bodily pain, fever, retching and prostration. Where there is a site of infection there is always a local lesion in the form of an in-flamed papule, which breaks down, liberating a core and leaving the sore with a punched-out appear-

### The MIRROR of PUBLIC OPINION

This column is designed to reproduce without bias the latest comment by the leading publicists, newspapers and periodicals on the questions of the day.

#### MISSOURI'S COUNTRY SCHOOLS. From the Kansas City Star.

THE child of the city has a nine months school, equipped to do standard work; in the cities there also are high schools of standard grade. But in nearly 2000 rural districts of the State there are school terms of less than eight months; in more than 300 districts the terms are less than six months, and in 50 districts there are less than four months. For nearly one-third of the young people in Missouri there are no high schools, that is, none in the districts in which the boys and girls live and none that may be attended without the paying of tuition. There are other inequalities of a similar nature in this State. It is these that are holding Missouri back educationally, giving the State not only a comparatively low rank but leaving many thousands of its children with-

out a fair chance at education It is to correct this condition that the ommunity school bill now pending in the Missouri Legislature has been devised. It is the aim of that measure to give every community in the State the chance to establish good schools, not only elementary but high schools. Its aim is to remove in qualities in taxation and in assessed valuation, so that adequate support will be possible in the great majority of school dis-tricts. Where it might be found impossible, then State aid would be provided. The bill would open the way to elimination of the small weak district, with a poor school, and would, if generally applied, reduce the number of districts in the State from more than 9000 to only 1000 or 1200.

#### THE RIGHT TO CRITICISE.

From the St. Paul Pioneer Press.

DMIRAL MOFFET thinks that "criti-A cism of the Government's policies from within the country is threatening to play havoc with the welfare of the United States." Agreement with this view will be far from unanimous. When the founders of this Nation wrote into the Constitution the clause that safeguards freedom of speech and of the press they not only sanctioned but invited criticism of the Govern ment's policies. They were well aware of the dangers to free political institutions that lie in censorship and suppression. Some of their descendants obviously are not. Government in this country is the servant of the people. When has the been above criticism by its master? As long as criticism of the Government's policies has a constructive motive behind it, any urtailment of it would be a distinct loss to the Nation, a threat to the liberty of the citizens, a backward step in the direction of autocracy and absolutism. A good deal of the criticism leveled at the Administration is puerile. This neither advantages nor disadvantages the Government or the country. What would seriously disadvantage both is the denial of the right of free speech and of a free public press. At the present moment the official Opposition in the House of Commons at Westminster is waging relentless war on the Government of Great Britain over the China situation and this is regarded in Great Britain as not only a legitimate but a natural

thing for it to do. A hundred and fifty-one years ago we declared our independence of the crown then worn by George III. What splendid Tories those Americans would have made who are afraid that the foundation of our institutions will be undermined if the entire American people does not send up a chorus of approval of every policy enunciated by the "White House spokesman"!

It is now made evident that he won't be happy till he gets it. When he kicks the clogs of commarcial affairs off his feet, his American rivals will need to look to their pennants. It may be the compliment to what true that the increasing popularity of Sir Thomas has been matched by the increasing popularity of tea. But the great merchant didn't go yachting for any such sordid purpose. Even while business held him he proved himself to be a real sportsman when the opportunity offered. And now that he is to make sport his more exclusive and particular business, the boys over here may prepare to get a real run for their money.

**NEGRO HEAVYWEIGHT BOXER DIES AFTER BEING KNOCKED OUT** 

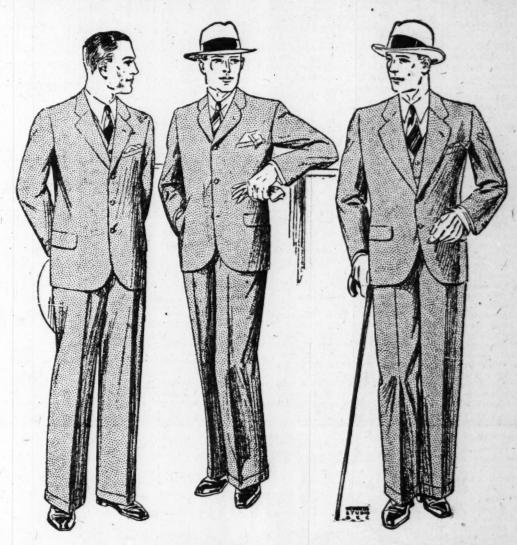

By the Associated Press. PHILADELPHIA, March 17. -Charley (Kid) Hill, a Negro heavy-weight of Wilmington, Del., died today as the result of a blow delivered by Jack Gross, Salem, N. J., last night. A terrific right to the chin sent Hill down for the count in the fourth round of what was to be a 10-round bout at the Olympia A. A. As he fell his head struck the mat and he falled to respond to restorative treatment. He died at a hospital without regaining con-

sciousness.

Club physicians, who examined both boxers prior to the bout, said the Negro appeared in perfect physical condition. The owners of the club, Al Nash and Jack Rinehart; the referee, Frank McCracken, a Philadelphia sports writer, and the seconds of both boxers were arrested.

## THE WRONG MAN WAS SLAIN

Sitting in the smoking compartment of a train, John Shevlin, former St. Louis detective sergeant, learned from a stranger how he, Shevlin, had been marked for death by a man he had arrested for a train robbery, and how another man had been murdered by mistake. All after 13 years, and the man who related the strange tale did not know that his listener was the man who had been marked for the robber's vengeance. This strange story is a feature of the next Sunday Magazine of the Post Dispatch.

Another feature was the advance in Spanish rates to a further high for recent years above the 171/2-cent level. Lire continued in good demand at the best level the year. Sterling remained steady.

Commodities Irregular.

No chivalrous man should marry a trusting little woman, these unless he has sufficient money to pay her the alimony to which is looking forward.

The great shock of many a sweet young girl's life, is to discovthat the man who promised at the altar to "love and cherish" her orever, is a week late or a hundred dollars short with the alimony.

It is a heartbreaking disappointment to marry a man for his money, and then find that the only way you can GET it, is to take It from him in the form of alimony. Every economist agrees that "a woman should receive a man's wages"—but it takes a divorce lawyer to tell her how to separate him from them.

If anybody NEEDS money it is a poor unprotected grass-widow, who doesn't know where her next "Daddy" is coming from. Ask some of our most famous Alimoniacs!
